About Me

Full-Stack Software Developer experienced in building robust and reliable web, desktop, and mobile applications. Strong understanding of customer-focused design and modern technology stacks.

Projects

Personal Portfolio

TypeScript.js, React.js, Tailwind CSS, Framer Motion, Vercel

- Utilised Tailwind CSS and Framer Motion to deliver a modern, responsive, and interactive UX.

UoA Aeronautics Club

TypeScript.js, React.js, Tailwind CSS, Framer Motion, Vercel

- Collaborated with stakeholders to translate requirements into a functional web platform.
- Implemented component-driven UI with dynamic rendering via mapped data structures
- Developed a responsive website commissioned by the UoA Aeronautics Club.

Animal Classifier

Figma, Electron, TypeScript.js, React.js, Redux, Vitest, Python, PyTorch

- Built a cross-platform desktop application using Electron with a React and TypeScript frontend.
- Integrated a PyTorch-based model for animal image classification.
- Independently designed the complete UI/UX using Figma.

Experience

Team Tech Lead & UI/UX Designer

UoA Animal Re-Identification (Desktop App)

Auckland Central, AKL

Jul 2025 - Nov 2025

- Recommended technologies aligned with team capabilities and client requirements.
- Reviewed and optimised code to improve system reliability and maintainability.
- Provided full-stack support, including DevOps workflows and unit testing.

Service Station Attendant

BP2GO

North Shore, AKL

Oct 2022 - Apr 2023

- Ensured customer satisfaction through proactive strategies to meet their needs & concerns.
- Identified root causes of complaints to resolve issues promptly.
- Enhanced professionalism in client and staff interactions.

Education

University of Auckland

Bachelor of Science in Computer Science

Auckland Central, AKL
